

Performance Testing

Date	30 September 2026
Team ID	SWTID-2026-6111
Project Name	FIT BUDDY AI
Maximum Marks	5 Marks

Performance Testing

Performance testing evaluates how your system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	[Not specified in the provided project document.e.g., JMeter, Locust, k6, Postman]
Type of Testing	[Not specified in the provided project document.e.g., Load Testing, Stress Testing, Spike Testing]
Target Module / API	[/generate-workout; /submit-feedbackSpecify which feature or endpoint was tested]
Test Environment	[Local system using FastAPI/Uvicorn.e.g., Local / Cloud / Hosted Server]
Test Date	Not specified in the provided project document.

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	User enters name, age, weight, fitness goal and workout intensity to generate a personalized 7-day plan.	Not specified	Not specified	A personalized 7-day workout plan is generated.
2	User submits feedback such as more cardio or more rest days to update the existing plan.	Not specified	Not specified	The plan is regenerated using the original plan and feedback.

3	User requests a nutrition or recovery tip based on the selected fitness goal.	Not specified	Not specified	A concise goal-related nutrition/recovery tip is provided.
4	Admin/coach views registered users and their original and updated workout plans.	Not specified	Not specified	Users and original/updated plans are displayed in the admin view.

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds	Not provided	Not evaluated	No measured result is reported in the source.
2	Response Time (Max)	< 5 seconds	Not provided	Not evaluated	No measured result is reported in the source.
3	Throughput (Req/sec)		Not provided	Not evaluated	No throughput result is reported in the source.
4	Error Rate	< 1%	Not provided	Not evaluated	No measured error-rate result is reported in the source.
5	CPU Utilization	< 80%	Not provided	Not evaluated	No measured CPU result is reported in the source.
6	Memory Utilization	< 80%	Not provided	Not evaluated	No measured memory result is reported in the source.

Step 4: Observations & Analysis

Key Findings:

Key Findings:

[Describe what the test results revealed about your system's performance]

The project document describes local deployment and API access verification, but it does not report measured performance-test results.

Bottlenecks Identified:

[Not specified in the provided project document.]

[List any performance bottlenecks observed during testing]

Optimization Steps Taken:

[Optimization Steps Taken]

Not specified in the provided project document.

[Describe any changes or optimizations made to improve performance]

Step 5: Screenshots / Evidence

Attach screenshots of your performance testing tool results below (e.g., JMeter report, Locust graphs, k6 output):

[Insert Screenshot 1 here]

No performance-testing screenshots or tool reports are included in the provided project document.

[Insert Screenshot 2 here]

No additional performance-testing evidence is provided in the source document.
